Mohamed Aymen Ghrab

Tunis,Tunisia aymenghrab3@gmail.com +216 96 671 671 Aymen Ghrab AymenGhrab

Summary

Highly motivated and results-driven Computer Software Engineer, recently graduated with a strong focus on full-stack web development and cloud technologies. Skilled in building scalable, high-performance applications using React.js, Angular, Spring Boot, Node.js, and Salesforce (including Marketing Cloud). Passionate about solving complex problems, collaborating in agile environments, and delivering high-quality solutions. Looking to contribute my skills to meaningful projects and continue growing within a dynamic engineering team.

Education

ESPRIT *Sept 2020– Sept 2025*

Engineering Degree in Computer Science specialized in Software Engineering.

Experience

End-of-Studies Internship *Feb 2025 – Aug 2025*

TALAN TUNISIA

- Designed and developed a digital marketing platform integrating Salesforce Commerce, Sales, and Marketing Clouds to improve customer experience and sales efficiency.
- Automated e-commerce and CRM data synchronization and built personalized customer journeys using Marketing Cloud Connect (SQL, automation, email/SMS).
- **Technologies:** Salesforce Clouds (Commerce, Sales, Marketing), LWC, Apex, Node.js, SQL, REST APIs, AMPscript.

CheckView – Web App for Check Image & Signature Verification *June 2024 – Aug 2024*

Amen Bank

- Developed and designed a web application for viewing and verifying images of checks and effects, including specimen signature verification and two-factor authentication (Google Authenticator).
- **Technologies:** Spring Boot, Oracle, Angular 16, JBoss, NGINX.

BatchJobs – Web Application for Batch Job Management *June 2023 – Aug 2023*

Amen Bank

- Development of a web application (batch jobs) with Angular and Spring Boot aimed at facilitating administrative operations for employees within the office
- **Technologies:** Spring Boot, MongoDB, Angular 16.

Skills

Languages: JavaScript, TypeScript, Python, Java, Apex
Frameworks / Technologies: Spring Boot, Angular, React, Node.js, Express.js, MongoDB, MySQL, Laravel, Symfony, Django, .NET
Salesforce Platform: Experienced with Sales Cloud, Marketing Cloud, Experience Cloud, and Lightning Web Components (LWC); proficient in Apex development, data integration, and automation flows.

Projects

ELKINDY– Music Conservatory Management *Jan 2024 – May 2025*

- Developed a desktop calendar with globally shared and synchronized calendars, allowing users to schedule meetings with other users
- Implemented real-time notifications with Socket.IO and integrated the Stripe Payment API.
- Monitored code quality with SonarQube, tested with Jest, and implemented CI with Nexus and Docker
- Technologies: Express.js, Node.js, React.js, MongoDB, Socket.IO, SonarQube, Docker, Nexus, Jest.

COOLSTAY– Accommodation Rental Platform *Sept 2023 – Dec 2023*

- Developed a web application in microservices architecture allowing users to rent or offer accommodations
- Developed independent services (authentication, accommodation management, search, etc.)
- Integrated Keycloak for identity management, and containerization with Docker.
- Technologies: SpringBoot, Node.js, Angular, Keycloak, Docker, MongoDB, H2, MySQL
